SKILLS SUMMARY

Programming Languages: Java, Python, C#, JavaScript, TypeScript, Ruby, SQL, HTML, CSS,
Frameworks & Libraries: Maven, ASP.NET ☒ Core MVC, .NET, Ruby on Rails, FastAPI, Flask, Node.js, Angular, React.js, Tailwind CSS, Spring Boot, RESTful API Development, SOAP Services
Databases: MSSQL, PostgreSQL, MySQL, Supabase, SQL Queries
Cloud & DevOps Tools: Docker, Kubernetes, Git, GitHub, CI/CD Pipelines, Jira, Confluence, Apache NetBeans, Eclipse
Software Engineering Practices: Agile, SDLC, TDD, Unit Testing, Version Control, Code Reviews, Documentation, Debugging
Operating Systems: Windows
Soft Skills: Analytical Thinking, Teamwork, Adaptability, Communication, Attention to Detail, Problem-Solving, Learning Agility

EDUCATION

Advanced Diploma in Information Technology <i>Nelson Mandela University</i> In progress	2026/01 Gqeberha, South Africa
Diploma in Information Technology Software Development <i>Nelson Mandela University</i> Graduated Cum Laude	2021/03 – 2023/12 Gqeberha, South Africa
Higher Certificate in Information Technology Support Services <i>Nelson Mandela University</i> Graduated Cum Laude	2020/01 – 2020/12 George, South Africa
NSC: Grade 12 <i>Oakdale Secondary School</i> Bachelor's Degree Pass	2016/11 Johannesburg, South Africa

WORK EXPERIENCE

Java Reactive Intern <i>Zensar</i> - Gained hands-on experience in Java, C#, and .NET development. - Completed the W3Schools Java Professional Certification. - Learned DevOps practices, including version control (Git) and CI/CD fundamentals. - Built foundational knowledge in databases and SQL for application development. - Prepared for Work Integrated Learning (WIL) to apply technical and professional skills in real-world projects.	2025/07 Sandton, Johannesburg
Junior Full Stack Developer <i>AgrigateOne</i> - Developed and maintained scalable backend services using Ruby on Rails and Python. - Optimized PostgreSQL queries for secure and efficient data handling. - Integrated AWS services (ECS, RDS, SES, Textract, SNS) to enhance application functionality. - Implemented Sidekiq for background job processing and improved task efficiency. - Troubleshoot and debugged full-stack application issues, ensuring system stability and reliability. - Participated in code reviews and pair programming, following Agile and Shape Up methodologies.	2024/02 – 2024/10 Johannesburg, South Africa

Graduate Cloud & DevOps Engineer

Disruptor

- Completed training and achieved qualifications in AWS cloud technologies.
- Assisted with web development tasks and explored solutions architecture concepts.
- Participated in simulated cloud migration and workload architecture reviews as part of coursework.

2022/11 – 2023/03
Johannesburg, South
Africa

PROJECTS

Thwala Attorneys Web Application

2025/03 – 2025/06

Portfolio Project

Tech: ASP.NET Core 8, C#, Entity Framework Core, SQL Server 2022, Docker, Docker Compose, SMTP Email

- Developed a full-stack legal case and client management system with MVC architecture and Entity Framework Core for reliable data persistence.
- Automated database migrations, SMTP client notifications, and application logging to ensure operational efficiency.
- Fully containerized with Docker and Docker Compose, improving deployment speed and scalability.
- Enabled secure case management workflows, client notifications, and role-based access for law firm staff.

Task Management Application

2024/12 – 2025/03

Portfolio Project

Tech: Angular 17+, TypeScript, SCSS, FastAPI (Python), SQLAlchemy, SQLite, JWT, SMTP

- Built a full-stack productivity platform with JWT authentication, user profile management, and email notifications.
- Implemented task CRUD operations, prioritization, tagging, status tracking, time tracking, and drag-and-drop functionality.
- Designed a personal productivity dashboard with analytics, overdue task alerts, and real-time updates.
- Delivered a responsive, mobile-friendly UI/UX with dark/light mode and seamless user interactions.

Primary Healthcare Management System

2023/03 – 2023/11

Capstone Project – Nelson Mandela University

Tech: ASP.NET MVC 7, C#, Microsoft SQL Server, JavaScript, HTML, CSS

- Developed a full-stack healthcare management system enabling secure scheduling, patient records management, and provider interactions.
- Implemented role-based access control, centralized patient database, and responsive design for multiple devices.
- Built modules for registration, family planning, prenatal care, counseling, chronic medication management, and vaccinations.
- Ensured security, scalability, and patient-centered functionality for underserved communities.

CERTIFICATES AND BADGES

- Cisco CCNA v7: Introduction to Networks
 - 120-Hour TEFL Certificate
 - Databricks Data Analyst Associate
- Cisco Introduction to Cybersecurity
 - Certified Java Developer
