PROFILE

Junior Full-Stack Developer with 2+ years of experience designing, developing, testing, deploying, and supporting enterprise and business applications across web, cloud, and data platforms. Proven experience delivering end-to-end software solutions using C#, Python, JavaScript, TypeScript, Angular, React, ASP.NET Core, Node.js, Ruby on Rails, SQL, and RESTful APIs.

Experienced across the full software development lifecycle, including requirements analysis, API development, database design, cloud deployment, application modernisation, debugging, performance optimisation, testing, and Agile software delivery. Strong understanding of enterprise applications, source control, CI/CD practices, and modern software engineering principles.

Experienced in AWS and Microsoft Azure cloud technologies, as well as data analytics and data engineering using Databricks, Python, Pandas, NumPy, SQL, and data visualisation tools. Capable of preparing and analysing data, developing data workflows, and producing meaningful business insights.

Passionate about building scalable, secure, and maintainable software solutions while continuously expanding expertise in cloud computing, artificial intelligence, DevOps, enterprise platforms, and modern software architecture.

SKILLS SUMMARY

Programming Languages: Python, C#, TypeScript, JavaScript, Ruby, SQL

Frontend: Angular, React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: ASP.NET Core, Node.js, Ruby on Rails, FastAPI, Flask, Spring Boot

API & Architecture: REST APIs, SOAP Services, GraphQL, Microservices Architecture, JWT Authentication, OAuth 2.0

Databases: PostgreSQL, Microsoft SQL Server, MySQL, Oracle SQL, Redis

Cloud & Enterprise Platforms: AWS Cloud Practitioner, Microsoft Azure, ServiceNow, Docker, Kubernetes

Data Engineering & Analytics: Databricks, Pandas, NumPy, Seaborn, ETL Pipelines, Data Visualization

Software Development: Object-Oriented Programming (OOP), Design Patterns, Software Development Life Cycle (SDLC), Agile (Scrum), REST APIs, GraphQL, Application Support, Software Testing, Unit Testing, Integration Testing, Debugging, Troubleshooting, Performance Optimization

DevOps & Version Control: Git, GitHub, GitHub Actions, CI/CD, Docker, Maven

Tools & IDEs: Visual Studio, Visual Studio Code, IntelliJ IDEA, Eclipse, Apache NetBeans, Postman, Jira, Confluence, Figma

EDUCATION

Associate System Administrator

ServiceNow University

• In progress

2026/03

Remote

Diploma in Information Technology Software Development

Nelson Mandela University

• Graduated Cum Laude

2021/03 – 2023/12

Gqeberha, South Africa

Higher Certificate in Information Technology Support Services

Nelson Mandela University

• Graduated Cum Laude

2020/01 – 2020/12

George, South Africa

WORK EXPERIENCE

Software Engineer

Zensar Technologies

2025/07

Sandton, Johannesburg

- Participating in enterprise technology training focused on SQL, cloud technologies, software engineering best practices, and Agile methodologies.
- Developing backend solutions while applying object-oriented programming principles and software design patterns.
- Building and consuming RESTful APIs and integrating applications with relational databases.
- Developing AI-powered chatbot solutions and intelligent automation prototypes using modern AI tools and APIs.
- Participating in internal innovation initiatives and hackathons, collaborating with multidisciplinary teams to design and deliver proof-of-concept solutions within tight deadlines.
- Working with Jira for sprint planning, backlog management, issue tracking, task estimation, and Agile project execution.
- Using Git and GitHub for version control, branching strategies, pull requests, and collaborative software development.
- Gaining practical experience with enterprise cloud platforms including AWS, Microsoft Azure, and ServiceNow.
- Performing debugging, troubleshooting, testing, and application support to improve software quality and reliability.
- Working with SQL databases to query, manipulate, and validate application data.

Junior Full Stack Developer

AgrigateOne

2024/02 – 2025/04

Johannesburg,
South Africa

- Designed, developed, tested, and maintained enterprise web applications using Ruby on Rails, Angular, TypeScript, Python, GraphQL, PostgreSQL, and Redis.
- Developed the Bulk Finance Rule Management module, implementing CSV import/export, validation, bulk create/update functionality, and automated error handling.
- Optimized PostgreSQL queries and backend services to improve application performance and scalability.
- Developed responsive user interfaces using Angular, Tailwind CSS, HTML5, and TypeScript.
- Worked extensively with AWS services including ECS, EC2, RDS, SES, SNS, and Textract to support cloud-hosted enterprise applications.
- Used Docker for containerized development and deployment across multiple environments.
- Developed and maintained asynchronous background jobs using Celery and Redis.
- Debugged production issues, investigated root causes, and implemented permanent software fixes.
- Collaborated with product owners, QA engineers, and developers using Agile Scrum methodologies, Jira, GitHub, and code reviews.
- Participated in sprint planning, backlog refinement, daily stand-ups, sprint reviews, and production deployments.

Graduate Cloud & DevOps Engineer

Disraptor

2022/11 – 2023/09

Johannesburg,
South Africa

- Supported cloud infrastructure hosted on Amazon Web Services (AWS) across development and testing environments.
- Provisioned, configured, and monitored AWS resources including EC2, RDS, IAM, S3, SES, Lambda, and CloudWatch.
- Assisted with deploying and maintaining cloud-native applications while following DevOps best practices.
- Automated deployment and operational tasks using scripting and cloud management tools.
- Configured IAM users, roles, and permissions following security best practices.
- Monitored application health, cloud resources, and system performance using AWS monitoring services.
- Assisted with troubleshooting cloud infrastructure, application deployments, networking, and production incidents.
- Supported CI/CD processes using Git, GitHub, Docker, and GitHub Actions.

PROJECTS

Personal Portfolio Website [🔗](#)

2025/11 – 2026/01

Portfolio Project

Tech: React 18, TypeScript, Vite, Tailwind CSS, React Router, GitHub Pages

- Designed and developed a modern, responsive portfolio website from scratch to showcase my professional experience, technical skills, certifications, and software development projects to recruiters and potential employers.
- Built a component-based application using React 18, TypeScript, Vite, and Tailwind CSS, featuring glass morphism, smooth animations, responsive layouts, CV download functionality, and integrated GitHub and LinkedIn profiles.
- Configured and deployed the application to GitHub Pages, optimizing performance, maintainability, and user experience while following modern frontend development best practices.

Thwala Attorneys Web Application [🔗](#)

2025/03 – 2025/06

Portfolio Project

Tech: ASP.NET Core 8, C#, Entity Framework Core, SQL Server 2022, Docker, Docker Compose, SMTP Email

- Developed a full-stack legal case and client management system with MVC architecture and Entity Framework Core for reliable data persistence.
- Automated database migrations, SMTP client notifications, and application logging to ensure operational efficiency.
- Fully containerized with Docker and Docker Compose, improving deployment speed and scalability.
- Enabled secure case management workflows, client notifications, and role-based access for law firm staff.

Task Management Application

2024/01 – 2024/11

Portfolio Project

Tech: Angular 17+, TypeScript, SCSS, FastAPI (Python), SQLAlchemy, SQLite, JWT, SMTP

- Built a full-stack productivity platform with JWT authentication, user profile management, and email notifications.
- Implemented task CRUD operations, prioritization, tagging, status tracking, time tracking, and drag-and-drop functionality.
- Designed a personal productivity dashboard with analytics, overdue task alerts, and real-time updates.
- Delivered a responsive, mobile-friendly UI/UX with dark/light mode and seamless user interactions.

MyYard

Portfolio Project

Tech: Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS

- Developed the backend and core business logic for a property rental platform focused on small apartments, rooms, and backyard rentals.
- Designed and implemented secure APIs, authentication, property management, tenant enquiries, messaging, and database functionality using Supabase and PostgreSQL.
- Built a scalable, responsive application with a focus on performance, security, and an intuitive rental experience for landlords and tenants.

Primary Healthcare Management System

2023/03 – 2023/11

Capstone Project – Nelson Mandela University

Tech: ASP.NET [🔗](#) MVC 7, C#, Microsoft SQL Server, JavaScript, HTML, CSS

- Developed a full-stack healthcare management system enabling secure scheduling, patient records management, and provider interactions.
- Implemented role-based access control, centralized patient database, and responsive design for multiple devices.
- Built modules for registration, family planning, prenatal care, counseling, chronic medication management, and vaccinations.
- Ensured security, scalability, and patient-centered functionality for underserved communities.

CERTIFICATES AND BADGES

- Databricks Certified Data Engineer Professional [↗](#)
- Cisco CCNA v7: Introduction to Networks [↗](#)
- Generative AI Application Deployment and Monitoring. [↗](#)
- Databricks Certified Data Analyst Associate [↗](#)
- Cisco Introduction to Cybersecurity [↗](#)
- Micro-Certification - Welcome to ServiceNow [↗](#)
- 120-Hour TEFL Certificate [↗](#)
